Michael A. Cirillo

Air Traffic Organization

Vice President, System Operations

Michael Cirillo, the Air Traffic Organization's Vice President of System Operations, is responsible for coordinating traffic flow for the day-to-day en route and terminal operations of the air traffic control system. He is the liaison to the Department of Defense and the Transportation Security Administration on air transportation issues.

Cirillo began his Federal Aviation Administration career as a controller in 1977. He's been with the FAA for more than 25 years, and has held several management positions, including Air Traffic Manager at El Paso Tower and High Desert TRACON, Manager of Operations Planning, and Program Director

for Air Traffic Planning and Procedures.

In 1999, Cirillo spent a year in Offenbach, Germany where he served as the lead FAA Liaison to the German Air Navigation Services.

Most recently, Cirillo served as the ATO's Director of Terminal Safety and Operations Support in Terminal Services.

Cirillo is a graduate of Regents College, with a bachelor's degree in psychology.
